

Casey's Story

Before the budget can be filled in, could you help me work out my monthly income, please? I work for 4 hours on Thursday night for \$13.36 per hour and 8 hours on Saturday for \$16.04 per hour at the local takeaway.

Could you also help me work out my monthly expenses?

Spotify is \$11.99 a month and I have Netflix too, which is \$9.99 a month. My phone is on a plan for \$60 per month. I like to head out with friends on Saturday nights which is \$150 a month and I spend the same amount on clothes, too. I get my hair products and a cut every 2 months, and that costs \$100.

I pay my mum \$200 a month for board. Food for my best buddy is \$119 per month. Then there's the yearly bill for the gym. That's \$728. Gifts for mates, I estimate at \$250 per year.

Thanks for helping me with a budget! I definitely don't want to be caught without cash again.
