

# Casey's Monthly Budget

Name: \_\_\_\_\_

Date: \_\_\_\_\_

## Casey's story

### Income:

I've looked at my pay slip and my net (take home) pay is \$140 per fortnight. What is my monthly pay?

### Expenses:

My phone is on a plan which costs \$60 per month [\$ \_\_\_\_ per month]

My gym runs a great discount if you pay a year in advance, that costs me \$840 per year [divide by 12 = \$ \_\_\_\_ per month]

I go out with mates every week and usually spend about \$25 each time [times by 52, then divide by 12 = \$ \_\_\_\_ per month]

I like to buy presents for my mate's birthdays [\$ \_\_\_\_ per month]

Gotta look good! I need a haircut every second month and buy hair products. That costs me \$100 every 2 months [divide by 2 = \$ \_\_\_\_ per month]

Fashion is another cost, I spend about \$150 per month [\$ \_\_\_\_ per month]
